PROFESSIONAL SUMMARY

AI Engineer and Machine Learning enthusiast with hands-on experience in developing NLP and Large Language Model (LLM) applications. Skilled in Python, LangChain, FastAPI, and vector databases for building Retrieval-Augmented Generation (RAG) systems and scalable AI solutions.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, HTML5, CSS, SQL (MySQL), Milvus Vector Database
AI Technologies: NLP, LLMs, RAG Systems, AI Workflow Pipelines, API Integration, LangChain, LangGraph,
Machine Learning: Scikit-learn, TensorFlow, PyTorch, CNN, GAN
Tools & Technology: VSCode, Version Control (Git), GitHub, Linux, Docker, Jupyter Notebook, Google Colab,

WORK EXPERIENCE

AI Engineer
XaasIO Pvt Ltd | Coimbatore, India (Remote) | Dec 2025 – Present

- Built AI/ML workflow automation pipelines using Kubeflow and MLflow for model tracking and orchestration.
- Developed Retrieval-Augmented Generation (RAG) based intelligent retrieval systems, including a live voice agent and a document-insight chatbot using LangChain and NLP.
- Integrated Milvus, LangGraph, and vLLM for vector search, workflow orchestration, and efficient model serving.
- Managed deployment environments with Linux, Docker, and version control using Git.

Key skills: Python, Linux, Docker, Kubeflow, MLflow, LangChain, LangGraph, Milvus, vLLM, RAG, FastAPI, Git, NLP.

PROJECTS

Real-Time AI Voice Agent | GitHub - mahieshwar-budati/javis-live-voice-agent · GitHub

- Built a real-time AI voice agent using LiveKit, enabling low-latency conversational interactions.
- Integrated STT/TTS pipeline with LLM backend to handle multi-turn voice conversations; implemented LiveKit Agents framework for room and track management.

Retrieval-Augmented Generation (RAG) AI System | GitHub - mahieshwar-budati/Basic-Advance-RAG · GitHub

- Built a context-aware AI system using LangChain and vector search to answer user queries accurately from document datasets.
- Implemented comprehensive data pipelines for document chunking, embedding generation, and semantic similarity search.

AI-Based Suicidal Tendencies Detection Model | GitHub - mahieshwar-budati/suicidal-tendency-report · GitHub

- Developed an NLP-based machine learning model to detect suicidal tendencies from text data.
- Executed data preprocessing and model training using Python, Pandas, and Scikit-learn.

EDUCATION

Bachelor of Technology, Information Technology | 2021 – 2025

- Chirala Engineering College, JNTU Kakinada, Andhra Pradesh, India, CGPA: 8.0 / 10

Intermediate | 2019 – 2021

- Narayana Junior College, Chirala, Andhra Pradesh, India

Secondary Education | 2015 – 2019

- Sri Chaitanya School, Chirala, Andhra Pradesh, India

CERTIFICATIONS

Oracle Certified: OCI AI Foundations & OCI Generative AI |Certificate|
Microsoft Certified: Azure Fundamentals |Certificate|
Infosys Certified: Big Data- 101, 201, 301 |Certificate |
Workshops: IIT Hyderabad & IIT Madras (Gen AI) |Certificate |
